

# MAGNI 540

## MAGNI 540 FASTENER COATING

Magni 540 is a chrome-free duplex coating that combines an inorganic zinc-rich basecoat and a black organic topcoat. Engineered for applications that require low friction, reduced noise and superior corrosion resistance, Magni 540 is typically applied to side-door-related applications, such as door strikers. It is also ideal for use on applications when noise reduction – squeak and rattle reduction, specifically – is needed.

- Processing characteristics offer thinner film and lower cure requirements compared to similar coatings
- Recommended application methods: dip-spin for basecoat; spray for topcoat

### PERFORMANCE DATA:

<b>Coating thickness</b>	10-30 microns (topcoat) over 7-10 microns (basecoat)
<b>Coefficient of friction</b> WZ101:	0.08
<b>Color</b>	Black
<b>Cyclic corrosion resistance</b> APGE:	30 cycles minimum D
<b>Salt spray</b> ASTM B117:	840 hours

### OEM SPECIFICATIONS:

Ford	ESE-MP13P6-B2
