

Magni 520 is a chrome-free duplex coating that combines electroplated zinc and hex-chrome-free passivated substrate with an organic topcoat. Typically applied to externally threaded fasteners, stampings and other types of hardware, Magni 520 is engineered for use on parts exposed to high amounts of ultraviolet (UV) rays and other harsh outdoor elements. Magni 520's two-coat system is applied via dip-spin or spray application methods and provides superior corrosion protection and cost-effectiveness.

FASTENER COATING

• Excellent bimetallic corrosion resistance

MAGNI 520

- Repeatable torque tension characteristics during assembly as a result of friction modifiers integrated into topcoat
- Resistant to acids and alkalis, and automotive fuels and fluids
- RoHS, WEEE and ELV compliant

PERFORMANCE DATA:

Coating thickness	5-8 microns (topcoat) over 8-10 microns zinc plate (basecoat)	Le Sie
Color	Various, glossy	4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4
Coefficient of friction*		
ISO 16047:	Various, range from 0.11 to 0.18	
Salt spray		0 0 0 0
ASTM B117:	1,000 hours	
UV testing		
SAE J1960/ISO 11507:	1,000 hours	
UL 1332:	1,200 hours	
Kesternich		
DIN EN ISO 6988:	15 cycles
